MAX-2000<sup>®</sup>

EZ-2000<sup>®</sup>

CS-2000<sup>®</sup>

Dr. Michael Williams received his D.D.S. Degree from Louisiana State University Dental School and his Certificate in Orthodontics from the University of California at Los Angeles. He has been in private practice in Gulfport, Mississippi since his graduation in 1980. Dr. Williams is a member of the ADA, and the AAO and has served as the president of the Fifth District Dental Association and the Greater Gulfport Dental Society. He was also a featured speaker at the AAO meeting in 1999 under the topic of "Clinical Advances in Orthodontics". Dr. Williams has also been a featured speaker to the AAFO and the AOS, and presently serves as the delegate for the state of Mississippi to the AAO. Dr. Williams has fostered five university sponsored research projects on arch development and molar distalization with nickel titanium coil springs systems. He holds several American and foreign patents in the field of Orthodontics and Dentofacial Orthopedics.

## What are some of the benefits you'll gain from this amazing two day course?

- You'll benefit from Dr. Williams 35 years of functional orthodontic practice, research, and patented appliances used in over 100,000 cases
- Extraordinary perception of what can be achieved in orthodontics today
- The concept not just moving teeth, but sculpting faces by harnessing natural bone growth and directing its trajectory toward full natural epigenetic development
- You'll gain freedom and chairtime by utilizing one of the many compliance free solutions that the Series 2000® line of appliances offers
- Correct sequence of treatment planning, coordination and timing
- Cases in all categories for discussion
- Explore the extraction vs. non-extraction debate
- Learning the present limits of arch development
- 13 continuing education hours

MAX-2000®

DMAX-2000®

MSX-2000®

## Learn how these compliance free appliances can refresh your practice!

The **MAX-2000®** eliminates at home confusion of appliance adjustment schedules for both patients and parents. The design is a “keyless” self-activating palatal expander similar to an RPE. The MAX-2000® provides low-continuous forces without the confusion of turning an expansion screw.

**DMAX-2000®** or “Distalizing Maxillary Expander” utilizes either a midpalatal nickel titanium open coil spring rod-tube mechanism or a standard jack-screw for transverse movement and the same rod-tube mechanism on the lingual to distalize the molars.

**MSX-2000™** or “Mandibular Spring Expander” is a totally spring activated appliance requiring only recall observation visits. The MSX-2000™ replaces the midline jackscrew with nickel titanium open coil spring rod-tube mechanism.

# ■ Patient Cooperation Not Required

*Learn how to use this new elastic free treatment!*

## The CS-2000® is Your Class II and Class III Solution

This revolutionary system will guarantee results with your Class II and Class III orthodontic cases. The CS-2000® Niti springs are a DynaFlex® exclusive, utilizing a patented, low-continuous force, closed coil spring and a specially built "key-hole" end which fits over a patented slotted base pivot similar to a Herbst® housing nut.
