

RMO® & DynaFlex®

Thinking of
Starting
treatment
early?

Join a distinguished group of practitioners as they review the latest developments and clinical findings in early orthodontic treatment. Traditionally, the pediatric community has a bias toward prevention.

Today, the orthodontic community is making an important contribution to the emerging guidelines for early orthodontic treatment.

This two day seminar will address the most common challenges encountered in patients under the age of eight and the orthodontic mechanics involved. Learn the latest on treatment methods and outcomes as they affect your practice.

Attend this upcoming
RMO's & DynaFlex's 2006
EARLY ORTHODONTIC TREATMENT MECHANICS SEMINAR

Get Your Questions Answered.

Get Your Questions Answered.

THE EARLY ORTHODONTIC TREATMENT FORUM FACULTY
WILL PRESENT CASE SELECTION, DIAGNOSIS, PREVENTION,
TREATMENT PLANNING, AND TREATMENT MECHANICS.

JOIN US NOVEMBER 9-10 :: Phoenix

Dr. Robert Vanarsdall is the chairman of the Department of Orthodontics at the University of Pennsylvania, School of Dental Medicine. He is board certified in both orthodontics and periodontics.

Dr. Judah Garfinkle earned his DMD from Harvard's School of Dental Medicine and is currently the Walter Lorenz Craniofacial Orthodontic Fellow at NYU's Institute of Reconstructive Plastic Surgery. His clinical interests include the treatment of craniofacial conditions and the use of orthodontic skeletal anchorage devices.

Dr. Leon Klemmner is a faculty member of Tufts University School of Dental Medicine and Stoney Brook Dental School. He has lectured internationally on the topic of Early Orthodontic Techniques and recently joined the Cleft Palate team of St. Charles Hospital in Port Jefferson

Dr. J. Kendall Dillehay is the President of the Southwestern Society of Orthodontics and a past First

Vice-President of the ADA. In addition to operating a bustling orthodontic practice in Wichita, KS, he also provides leadership for a number of professional organizations.

Dr. Tim Auger has practiced on the Monterey Peninsula since 1993. He has earned degrees from both Boston University School of Dentistry and UCLA and is an expert in distalizing mechanics as an adjunct to early interceptive treatment.

Dr. Michael Williams is a pioneer in tissue engineering using low continuous force for dentofacial orthopedics and has provided innovation in orthopedic/orthodontic appliances for transverse development. In practice since 1980, he has lectured and published internationally.
